6208 W. Okanogan Ave.
Kennewick, WA 99336

*Thank
You*

Dear Mr. Kataroff

On behalf of the Citizens for Medical Isotopes (CMI) and its Board of Directors, I would like to thank you for your contribution to the Medical Isotope Symposium, "The Cure Starts Here!" March 26th in Kennewick, WA.

Thanks to support like yours, this event drew about 200 people from industry, research institutions and labor to learn about the ability of medical isotopes to improve human health care. Attendees heard from an array of knowledgeable speakers including Dr. Ruth Bryan from the Einstein College of Medicine and Dr. Jack Singer of Cell Therapeutics. Reverend Jesse Jackson spoke to lend his support to CMI's efforts to educate our local and national leaders about the medical isotope industry, its needs and uses among health care professionals and the public.

Citizens for Medical Isotopes' mission is to provide information and advocacy on the use of medical isotopes in the diagnosis and treatment of health maladies for the general population. Contributions like yours help to make this possible.

Please mark your calendars for the International medical isotope convention, Isotopia, scheduled for May 13-15, 2009. We look forward to working with you in the future.

Thanks again for your support!

Sincerely

Gary L. Troyer
Chair - CMI
P 509-946-3425

cc CMI

Citizens for Medical Isotopes is a US 501(c)3 organization established to educate and inform citizens about all aspects of medical radioisotopes including those used for nuclear medicine purposes, medical instruments/products sterilization, food irradiation and other purposes and to promote increasing the quantity, variety, availability and subsidy of United States produced medical radioisotopes for research, development, clinical trial and production purposes.
